

Don't you agree that, if you can monitor latest statuses of legislations and if you can track legislators who already support, oppose or undecided about legislations of your interest, you can do better targeting?

Bills and Votes module offers you to do just that. Bills and Votes lets you identify, target and influence legislators who support, oppose or undecided on your issues. Using this module, you can manage and monitor bills and votes that are being considered in Congress and in State Legislatures. You can also manage bills and votes that haven't yet been considered in Legislatures. In addition to that, you can track the positions (e.g. sponsorships, support levels) of legislators on your issues and bills for better targeting.

Number	Title	Sponsor	Is Public
H.R. 1234	Pathway to Stable Families and Probiotic Youth Act of 2012	Shannon, Chuck	No
H.R. 1235	Track Bill for info		No

H.R. 1242	Proceeding for consideration of the bill (H.R. 1238) to...	Shaw, Stephen	No

Integrated Bills and Votes Module

Unlike standalone bill tracking systems, Bills and Votes is an integrated module of Aristotle 360 product. Using this module, you can leverage bills and votes information and perform relevant targeting activities without needing to exchange data between different systems.

Monitor Recent Legislative Information

You can monitor most recent legislative information such as voting records and sponsorships, and act in time to influence pending legislations. Any changes in legislative information, sponsorships etc. are automatically updated in the module.

Influence Legislators and Staff

Monitor the positions of legislators for legislations being considered on legislature floor or in a committee. Identify legislators and their staff for direct targeting including emails to staff, fly-ins to meet legislators etc. You and your advocates can send Thank You emails to legislators who voted on bills of your interest. Create scorecards for legislators based on their voting history and use these scorecards for targeting them both directly and through advocate communications.

Generate Legislation Based Advocate Communications

Tie a bill or a vote of your interest to an action alert and publish it to your website for advocate actions. Educate and influence your advocates by making bills and votes' information available on your website.
